ATU Environmental Policy

As ATU Tourism Management Inc. and ATU Antalya Store Management Inc., we consider environmental protection one of our fundamental corporate responsibilities within the scope of our duty-free retail operations. To control the environmental impacts of our operations, use natural resources efficiently, and contribute to sustainable development, we adopt the following principles:

Our Commitments

- To comply with applicable environmental legislation, legal requirements, and other obligations to which we are subject,
- To continuously improve our environmental performance and enhance the effectiveness of our environmental management system,
- To promote the efficient use of energy, water, and other natural resources,
- To reduce waste generation at the source and support recycling and reuse practices,
- To reduce environmental impacts by optimizing the use of packaging materials,
- To undertake initiatives aimed at reducing greenhouse gas emissions and the carbon footprint arising from our operations,
- To foster environmentally responsible procurement and business practices with our suppliers and business partners,
- To conduct training and awareness activities to raise environmental awareness among our employees,
- To take the necessary measures to prevent pollution and mitigate environmental risks,
- To support sustainable practices by assessing climate change-related risks and opportunities,
- To contribute to environmental protection in cooperation with airport operators, customers, and other relevant stakeholders.

This policy is adopted by all our employees and business partners and provides a framework for setting our environmental targets.
